## **PRODUCT NOTES**

### **65-208 Corvette Valve Covers**

**These valve covers are designed to fit 92-96  
Corvettes. They will not fit 93-97 F Body Cars.**

**NOTE:** For the best sealing results we recommend using the Fel-Pro 1648 Gasket

#### **INSTALLATION NOTES:**

- 1) The corners of the valve covers can sometimes cause sealing issues. Use a bit of sealer on the corners where they are ground down to ensure a good seal.**
- 2) Be sure not to tighten down the bolts too tight. This will cause the edges of the valve cover to flare up and cause leaks. Tighten the bolts just enough to compress the gasket.**

**\*\*CAUTION:** Due to these being a fabricated piece they can be a challenge to install. If you have any issues or trouble please email us at [info@cantonracingproducts.com](mailto:info@cantonracingproducts.com) or call our tech line: 203-481-9943
