

45 Years & Still Moving Forward

TCI® Has Been A Leader In Performance Torque Converter Technology Since 1968 And We're Not Done Yet.

Standard Features

- Furnace-Brazed Fins For Stall Consistency
- Heat-Treated Sprag Races & Steel Hub
- HDT Coating™ Improves Heat Dissipation
- Computer Balanced To Strict Tolerances
- Heat-Treated Steel Turbine Spline For Greatly Improved Durability
- Additional Bearings Increase Thrust Load Capacity & Reduce Drag
- 100% Tested & Triple Quality Inspected

Nobody Knows Performance Torque Converters Better

Each TCI® converter is custom designed for your specific application by real drivetrain engineers and built with pride by the most highly trained builders in the industry.

STREET/STRIP

TCI® Breakaway®, StreetFighter®, Super StreetFighter™ and Ultimate StreetFighter™ Torque Converter series are available for most popular AMC, Chrysler, Ford and GM street/strip applications. Whether it's a late model lock-up converter or a conventional converter, TCI® has the technology and experience to get maximum performance from them all.

DRAG RACE

With 7", 8", 9", 10" and 11" Drag Race Converters available, as well as PRO-X™ 9" and 10" Converters, TCI® carries hundreds of custom designed converters for various drag race classes, horsepower levels and drivetrain setups. They are available for popular AMC, Chrysler, Ford, GM and Lenco transmissions. From Bracket to Outlaw racing, TCI® has consistently produced more champions and race winners over the last 45 years than any other performance drivetrain company.

OVAL TRACK

Delivering faster starts and maximum corner exit speed, every TCI® FastLap Torque Converter™ is built specifically for the needs of automatic transmission-equipped oval track racers. Available in 10", 11" and 12" configurations, there are over 50 custom designed converters available for Ford C4, GM Powerglide and GM TH350/400 transmission setups, including "direct drive" converter applications.

HEAVY-DUTY

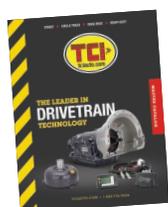

Both the TCI® Maximizer™ Towing & Street Series and the Tractor Pull/Monster Truck & Off-Road Series of torque converters are engineered with the strongest parts available. Built to deliver increased low-end muscle and better fuel mileage while also providing an unmatched level of durability for extreme usage, they are available for popular gasoline and diesel AMC, Chrysler, Ford and GM applications.

Yes, We Can Do That!

Need something special? TCI® will gladly custom engineer and build a torque converter for your exact needs. We provide this service to our customers without extra charges and in most cases we can have it at your doorstep in a matter of days. To discuss your application, simply call the knowledgeable TCI® tech support team and they'll help you find the perfect converter for your performance needs.
