

ENGINE COVER

Sprint Car Thermal Engine Cover

The heavy duty triple layer constructed DEI Sprint Car Thermal Engine Cover helps prevent engine cool down between races and is built to last.

Features:

- Durable PVC coated polyester outer layer
- Glass fiber inner insulation
- Final layer of glass fiber blanket
- High strength fiberglass edge binding
- Use of heat & flame-resistant Nomex® fiber thread
- Built-in stainless steel snaps

Advantages:

- Prevent engine cool down between races
- Can be used on hot or even running engines without damaging the cover
- Drop-down side wings helps keep more heat under cover
- Side wings (flaps) can rest directly on hot exhaust
- Wings can be folded up and snapped into place

Benefits:

- Helps keep engine up to racing temperature
- One size fits all
- Easy to install
- Built to last many race seasons
- Fits all Sprint cars
- Built Ohio tough

DURABLE OUTER LAYER LASTS FOR YEARS

HIGH-TEMP FIBERGLASS INNER LAYER CAN REST DIRECTLY ON HEADERS WITHOUT MELTING
